SPEED/POWER CHART

8 knots	48 SHP
9 knots	63 SHP
10 knots	84 SHP
11 knots	115 SHP
12 knots	145 SHP

The above figure is the absolute maximum speed for the hull, regardless of power installed.

All speeds are in knots per hour. To convert to miles per hour, divide by .87. Horsepower is given as constant 24-hour rated SHAFT HORSEPOWER (SHP); NOT brake horsepower (BHP), nor intermittent ratings. It makes no difference if the engine is diesel or gasoline powered.

Inches of immersion = 1" per each 2,043 lbs added.
