

# Foamee Notes

## Building cost

The following price refers to the Foamee built as a tender and does not include sailing accessories.

"The plans from Glen-L were extremely thorough, and included full-size templates for the building forms and a sheet with over 60 pictures describing the building process. Construction took about a month and a half of evenings and weekends; probably 80 to 100 hours total. Materials cost about \$800."
