

Outboard Power Boat Racing

Our stock class racing runabouts were designed to fit into APBA racing classes. The racing classes were extremely popular and well organized, with racing active across the nation, using stock motors for ready availability and low cost. These classes specified a minimum total weight (driver, motor, and boat) in each class to equalize competition. These classes are no longer active. For those interested in class racing, we suggest you contact APBA (American Power Boat Association) for current active classes and specifications.

Of course, even if you don't want to race, our CLASS RUNABOUTS make great boats for fun and thrills on the water. All of our racing runabouts are suitable for adults or properly supervised youth.
