

Wee Hunk Notes

3-11-02: I purchased your Wee Hunk plans and completed the boat this past weekend. I have about **60 hrs** into the project. It was my first boat building project, although I have built a couple of houses, custom cabinets and furniture. I enjoyed every minute of the project. I hope to send some photos to you soon. I put a 30hp 4 cycle motor on the boat and I hope to try it in the water next weekend.

3-15-02: Tried the boat yesterday. Breaking in the 30hp I didn't exceed 3200 rpms about 1/2 throttle. I estimate the speed at about 20 mph with 2 passengers (about 200 lbs. each).- Paul G. Sadeck
